THE GEICO TDI ENDURO/CROSS TEAM FINDS SUCCESS RUNNING BEL-RAY LUBRICANTS

August 2008—GEICO TDI Racing is a competitive race team admired for its leadership, world class performance and growth. A key component in the accomplishment from the team has come from the lubricants that they run in their bikes. "We are very happy to be running Bel-Ray this year and have seen some tremendous success because of it," said Gretchen Bennett, Team Manager. Here the riders identify some of their favorite Bel-Ray Products.

Ryan Rodgers

"Bel-Ray's Thumper 4-Stroke Oil is top of the line motor oil that is reliable and burns clean. It will take you to the finish line fast."

Bel-Ray Thumper 4-Stroke Racing Motor Oil

is specifically engineered to meet the demands of single-cylinder, multi-valve 4-stroke racing engines. The high temperatures and severe loads of racing require the exceptional film strength, shear- and temperature stability of Bel-Ray Thumper 4-Stroke Racing Motor Oil.

Eric Rodgers

"Bel-Ray's Super Clean Chain Lube is amazing and has doubled my chain life with no fling-off."

Bel-Ray Super Clean Chain Lube is a unique premium product designed exclusively for motorcycle and ATV 'O' ring chains. It sprays on evenly and provides complete coverage of the chain, creating a waterproof barrier that prevents rust and corrosion. Bel-Ray Super Clean Chain Lube will not fling off and repels dirt and sand.

JT Bennett

"This stuff is great. It is completely waterproof and protects my filter during those especially muddy races."

Bel-Ray Foam Filter Oil is an easy-to-apply waterproof premium product specifically designed for foam filter elements. It maintains maximum intake air flow while removing airborne contaminants encountered in serious off-road conditions and other dusty or wet applications.

Josh McLevy

"I have been using Bel-Ray Gear Oil this year for the first time and it makes my clutch last the length of the race with no wear or slip at all."

Bel-Ray Gear Saver Hypoid Gear Oil is formulated for sliding contacts of spiral bevel gears in differentials and shaft drive transmissions. It provides superior lubricity and anti-wear, added power, smooth shifting and gear protection.
